Additional Task to Contract Imagery Interpretation Support

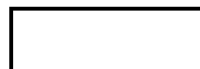

Study of Field Forces as a Function  
of Photographic Ground Resolution

In the event that the estimated funds for ACDA contract Imagery Interpretation Support, Task I through III are unused a further task will be added to expend the additional  of the contract.

STAT

The Task IV will provide imagery in vu-graph form of field test forces analagous to those being considered for FT-51 and outline the planned research. There will be approximately five vu-graphs and a short report on the vehicle similarities. There will also be an outline of the planned resolution study under contract for another customer, which will be extremely valuable to any force reduction verification system.

Man-hours    03 - 24.0  
              20 - 6.0

TASK ASSIGNMENT  
AERIAL SURVEILLANCE IMAGERY INTERPRETATION

Task No. 4

Due Date: 30 Jun 70

Title: Study of Field Forces as a Function of Photographic  
Ground Resolution

Description:

This task will select and provide imagery in vu-graph form and prepare a brief report in support of the data base analysis being performed under Task 2. This imagery will include a selection of targets as available from the proposed test area and/or other targets analogous to those being considered. The accompanying report will discuss ground resolution as a function of target composition.

Special Instructions and Remarks:

Special instructions are contained in the attached Statement of Work.

STATINTL

Approved

Date: 19 June 1970

STATEMENT OF WORK

General Plan

A report and vu-graphs will be prepared to demonstrate the relationship that exist between field force military targets and photographic ground resolution.

Specific Tasks

1. Prepare a report showing field force military targets and the ground resolutions requirement for identification (including information which might be available from contractors present studies).
2. Present vu-graphs noting field force targets composition and the similarity of these targets to those located in the  test area.

General

Work on the project will be completed and draft report forwarded to the contract manager for review prior to 30 June 1970.
